

Welcome Home (12.2011)

Cry, try to cry the pain away
Try to flee from this black day
Life will bring you down again
And drown you in sorrow

Fear, fear controls your mind
It slowly makes you blind
It's driving you insane
My friend, just listen:

Whatever you do, evil is part of you
It waits patiently, deep inside

Welcome home, 666
Ensconce yourself in me
Welcome home, 666
Feel free to breed

Down, caught in misery's trap
Gloom's about to canker your head
So, if you are lost in feeling sorry for yourself
My friend, you better listen:

Whatever you do, evil is part of you
It waits patiently, deep inside

Welcome home, 666
Ensconce yourself in me
Welcome home, 666
Feel free to breed
Welcome home, you won't get me
